

THE EMPRESS EXPRESS

VOLUME IX, No. 19

EMPRESS, ALTA: THURSDAY, Oct. 6th, 1921

Price: \$2.00, Per Year

UNION CHURCH

Services will be held as usual Sunday School, 11 a.m. Evening service, 7:30 p.m. Beauty and Service, 3 p.m. Rev. V. M. Gilbert, pastor. Cordial invitation is issued to all to attend.

Choir practice at the home of Mrs. H. H. Hall, on Friday evening at 8 o'clock.

Closed Season in These

Parks for Muskkrats

In order that the amendment to the Game Act passed at the recent session of the Legislature with respect to the season on muskrats may be complied with, or if not complied with enforced by those instructed with the enforcement of the provisions of the Game Act, I take the liberty of bringing this matter to your attention and advising you that the open season for muskrats to the North of the North Saskatchewan River is from December 1st to April 30th following, while to the South of the North Saskatchewan River there is no open season. Provision, however, has been made whereby permits can be obtained on payment of \$1.00, if there are a sufficient supply of rats in any locality to justify the issuing of such permits.

I will be pleased to have you advise all those interested in trapping as to the proper season not only for muskrats but for other fur bearers as well, as a strict compliance with the requirements of the Act in this respect will result in the obtaining of a much better quality of skins, and naturally a better price will be realized.

Chief Game Guardian.

Baseball League Will Hold Banquet

The Empress and District Baseball League are holding a banquet at the B. C. Cafe, Empress, on Friday, October 14, at 8 p.m. The business of the past season will be fluently dealt with. Officers for the 1922 season will be elected. Seating capacity, however, is limited to fifty diners, allowing for ten members from each club. In the event of non-attendance of a full number from each club, the invitation is extended to those interested in the league, and is governed by the number that can be accommodated. Price, will be 75c, per plate. Those wishing to attend should notify, I. McLean, Sec., Empress.

Number of Seats in Next Federal House

The total number of seats in the next Federal Parliament will be 235. Of this number Alberta will have 12, British Columbia, 13, Manitoba, 15, Saskatchewan, 10 and the Yukon, 1; total, 57. There will be 178 seats east of the great lakes. Of this total, Ontario, will have 82, Quebec, 55; Nova Scotia, 16, New Brunswick; 11 and Prince Edward Island, 4.

Potatoes Prices in Wolsley District Are Scraping the Bottom

Potato prices in this district vary. The crop is a big one, possibly the largest and finest ever produced. Two weeks ago 75c. per bushel was being asked, but now with the crop above ground, or almost so, storage facilities are at a premium and

Local Board of Trade Petition Railway Company re Construction Work

The local Board of Trade are approaching the Canadian Pacific Railway Co., petitioning them if they are contemplating building a bridge across the Red Deer river in the immediate future that the work be commenced this fall. Owing to smallness of crop, such construction would materially assist many farmers to tide through the winter and the Company would be able to secure all the labor they required at a very reasonable price.

Senior C.G.I.T. Club Elects Officers

The Senior C.G.I.T. Club met on Wednesday, October 5, in the school room next to the Post Office. The officers for the ensuing year are: Leader, Mrs. Humphries; President, Perdita York; Vice - President, Eva Clark; Sec., Edith Rowles; Treas., Inez Clark. The club will meet again next Wednesday night at 7:30 sharp in the school room.

Unearthed Remains of Pre-historic Monster

Charles Sternberg, representing the Ottawa Museum has just unearthed the largest specimen of a Gorgosaurus ever discovered in Canada, on the banks of the Red Deer at Steveston. The jaws of the specimen recently located measure 41 inches in length, while teeth are 7 inches long, including the roots. Scientists estimate that the animal, when alive would measure over 35 feet long with a height of 8 feet at the shoulder. This is the second specimen unearthed at Steveston, this summer, the former being discovered by George Sternberg, who is working in the interests of the Alberta University. His specimen was somewhat smaller than the one just discovered, the jaw measuring 24 inches with 14 inch teeth.—Ex

potatoes are being offered for as low as 25c and 35c per bushel.—News, Wolsley.

R. M. of Manario

Minutes of meeting of September 17, at Orange Hall, at 10 a.m. Present: Reeve Ardell, Couns. Jones, Connell, Walker, White and Rivers.

The minutes of the previous meeting were read and confirmed.

A letter was read from F. J. Clark of Alaska, resigning his position as auditor, on account of his leaving the district temporarily.

Walker.—That S. Suddaby be appointed auditor at a salary of \$30 for the interim audit \$70 for the annual audit with allowance of \$1.50 per diem during the time he may be away from home on the work, the Municipality to pay the auditor's licence fees.

Rivers.—That the orders of Messrs. James and Wright making all monies due them payable to the Union Bank, Alaska, be accepted. That the Sect. be instructed to make payment when authorized to do so in writing by Councillor for Div. V.

White.—That the Sect. take up with the C.N.R. and with their engineer, Mr. Campbell and also with the Dept. of Highways, the condition of the railway crossings and insist on same being made passable for traffic, with special reference to those under construction Acadia Valley Branch.

The Finance committee examined accounts presented. The following were found correct and ordered paid on motion of the Reeve:

R. White, assisting surveyor, \$5.00; Mrs. White, board, 14.00; L. Guheen, machinery, acct., 13.43; Beaver Lumber, central roads, 55; Sect. Treas., postage, 29.16; W. Templeton, machinery, acct., 3.00; Ditto, survey stakes, 7.00; James and Wright, acct., contract, 204.33; J. Mahoney, acct., contract, Div. VI, 3.50; Ditto, Div. V, 20.12; Ditto, Div. IV, 39.60; F. B. Bates, culverts, Div. V, 60.00; H. Thompson, driving surveyor, 20.00; S. Wright, driving surveyor, 45.00; A. F. Sawyer, destruction of weeds, 14.00; Imperial Lumber

Yards, Estuary culverts, Div. I, 196.11; F. D. Jones, supervision of roads, 27.00; J. F. Rivers, ditto, 7.00.—Total, 748.35.

Jones.—That the third quarterly advance be paid to schools.

Jones.—That Coun. White be appointed to attend the Tax Sale and purchase certificates on behalf of the Municipality.

Ardell.—That the Sect. Treas. be authorized to negotiate the sale of any certificates purchased by the Municipality to the best advantage, provided that at least par value is obtained for same.

The Council accepted with regret the resignation of F. D. Jones, Div. IV, same to date from 2nd day of November, Mr.

Jones stated that his resignation was due to the fact that he was leaving the neighborhood for a while.

Adjournment moved at 6 p.m., to meet again at the usual time and place, Saturday, October 22.

C. Evans Sargent, Sect. Treas.

United Sunday School

Will all those who received "Quarterlies" last Sunday, please be sure and bring them to school next Sunday, when we will hope to have the "Blue Quarterlies" on hand.—Mrs. E. S. Sexton.

LET US GET BUSY

On that broken or defective part of your car and make it right. You are not getting complete service or real pleasure from your auto or machinery investments if you are hampered by broken parts. We will keep them running for you.

Alberta Machine Shop

I have around 30 pairs of BOY'S SHOES

sizes from 11 to 2, solid leather, guaranteed, no fibre or paper, at

2.95 per pair

Also a good assortment of

MEN'S SHOES at Reasonable prices

G. W. MARTYN

SO OFTEN YOU HEAR THESE DAYS:

"Why is it that nothing has gone down in price but wheat?" We beg to advise that while the machine Co.'s have practically made no reductions, but have increased prices their have been numerous reductions in the hardware lines, for instance:

Martin Senour 100% Pure PAINT is selling	TO DAY at \$5.50 per gallon	a year ago \$7.50
KELORENE or Coal Oil, is selling	" 40 "	" 50 "
GLASS is selling at a discount on the dollar of	" 25 below "	" prices "
AUTO TIRES, Non-skid	" 20.00 "	" 27.00 "
BARB WIRE, is selling, per spool	" 6.00 "	" 7.75 "
FORD TOURING CARS, with starter and all latest equipment, F.O.B. Ford, Out. \$	650.00 "	" 775.00 "
Added to this was a Luxury Tax of, \$80.		
CAR COMPLETE, delivered in your own yard	750.10 "	" 1032.40 "
HARNESS and Harness parts are selling at a Discount of	" 30 under "	" prices "

These are a VERY FEW of the hundreds of reductions that we are giving you to lay over prices of a year ago. If you doubt it make us prove it. We will be glad to.

The Store With The STOCK that can Supply all Your Needs in HARDWARE

N. D. STOREY

EXTRA \$7.15 DEAN (C) 1918 FORD

Britain Likes Flavor Of Canadian Butter Shipped From Prairies

The butter situation in Canada is a whole lot not especially cheerful at the moment, but there are indications that an improvement may be looked for before the turn of the year. At present the stocks in Montreal are exceptionally heavy, particularly as compared with 1920. In 1920 there were in store at Montreal 131,000 boxes of butter; today there are 166,000; and the stocks of cheese are even heavier in proportion, as in 1920 there were on hand 138,000 boxes of cheese, while today there are 233,000. Of the butter held at Montreal there is very little that has been made in Western Canada, as from June the "prices were fairly satisfactory and Western creameries sold very close to their making some, in fact, are today oversold, with the result that stocks of creamery held on the prairies were never lighter.

The bulk of the western butter that has been shipped from the prairies has been sent overseas, and not from Great Britain are to the effect that the quality is very satisfactory on account of the light salting and excellent flavor. This gratifying result is undoubtedly due to the policy which has been adopted in the prairie provinces of a standard and government grade and the rapid extension of grading of cream as well as grading of butter.

The dullness of the butter market at the present time and also the rather depressed feeling of the trade is accounted for in many ways. One of the main difficulties with regard to the continuance of shipping Canadian butter over to Britain is the fact that the present large amount of government controlled butter on hand. Very recently 7,000 boxes of New Zealand butter arrived in England on one of these old contract and there was a heavy stock even before this arrival. The butter is not in good condition, is of high quality, and at present the trade is in doubt as to what price the government will put on this surplus butter on the market at from time to time. Then another factor, and this is probably more of a theory than of actual proof, is that the trade will not conclude contracts with New Zealand shippers for supplies from that country for the next six months until after the middle of September and that they will not declare a price for Canadian butter until after these contracts are made.

It is quite freely stated that the British Government was compelled to pay more for both Canadian and New Zealand butter last year, but particularly for Canadian, owing to the fact that shippers from the latter land butter to the Pacific province realized higher prices than Britain expected to pay and the government was obliged to advance the market price. This year it is not a case of the government buying but the dealers, and possibly also the exporters, are they are resolutely holding off from Canadian butter until they have completed contracts with New Zealand.

Yet another factor, and one that there is a very reasonable probability of lower ocean rates in the winter and that the shippers do not want to commit themselves until they see what these rates will be. These are probably some of the reasons for the present depression of price; the outlook, however, would seem to be for an improved demand and slightly better prices later in the season. The very dry season in Denmark is reported to have fulfilled the make in that country, and also a considerable portion of the make has not reached British markets but has gone to other markets, and the same is, to some extent, true of Holland. Practically all of Holland's cheese is being consumed in Germany, so far as the prairie provinces are concerned, the make throughout the season has been satisfactory and the quality has been uniformly high, although it is not only by the reports from what has been shipped to Britain but from the standing of western butter at the recent London Exhibition in Toronto, where practically all the important prizes came west.

Lift His Right Hand at Tenebris. Nelson returned to the prairie after the glorious victory of the Nile, he landed at Yamouth. He was a Norfolk man, and the people, trans with enthusiasm, dragged his carriage to the place where he was to be presented with the freedom of the borough.

In taking the oath, Nelson placed his left hand upon the book. "My lord," said the town clerk, of Tenebris, "your right hand."

"I left that at Tenebris," said the Admiral quietly.

A towns pre heated by electricity is a recent French invention.

Geologist Returns From Fort Norman

Has Taken Observations for Wireless And Made Maps.

After a long season's work in the north country, Dr. D. B. Dowling, Dominion Government Geologist, has returned to Edmonton. He was accompanied by his son, Allan Dowling, and E. D. Irwin, the entire party being from Ottawa, to which city they expect to return.

Dr. Dowling proceeded north in the spring to look over operations by the Dominion land survey in the northwest territories, by the astronomical branch of the department of the interior and by the land survey department. The entire territory between Fort Smith and Fort Norman was covered. In this stretch of country practically the entire territory was surveyed, which the astronomical branch made important observations for longitudinal control for the year.

A map, which is as close as possible to being perfect, was also made by the government party. Buys were set out on the coast of the Mackenzie River is dangerous for navigation.

In the opinion of Dr. Dowling, development and drilling in the north country is being greatly impeded owing to the difficulties encountered in shipping in transporting even the smallest parts of machinery.

Plan To Make Airplanes Safe

Must Make Best of Bad Situation Since Absolute Safety.

The claim is made by Professor Barton Scrammell, of Dover, England, that a discovery which will enable absolute safety in the flight of aeroplanes by obviating the chance of the knowledge of the pilot in the flight of birds by the pilot. A model is being made to explain the process, and also a large model which will enable one man to motor cycle to the bar from sea front at Dover all round the harbor and back in perfect safety. Professor Scrammell is being assisted in this matter by Mr. Dellbridge, a member of Sir Ernest Shackleton's last expedition to the South Pole. On the homeward journey Mr. Dellbridge observed an aeroplanes, which followed the ship for hours without one single movement of its wings. It is not expected to increase speed or bring power, although this may be a surprise to some. It is contended that the discovery will absolutely ensure safety in descent.

Versailles Treaty Disappoints France

Must Make Best of Bad Situation Says Poinecare.

M. Poinecare, former president of the Republic in his enlightening article in the Revue des Deux Mondes, says that the Versailles Treaty has caused deep disappointment in France. The premier stated that the responsibility because it ratified the treaty, but it was useless for France to engage in retrogressive rearmaments, she should try to make the best out of a bad situation, which was created by circumstances rather than by men.

According to M. Poinecare, neither Washington nor London is sacrificing national interest in order to consolidate the alliance of the four nations. "They are English in London and Americans in Washington, and quite rightly, so let us be French in Paris," says the former president.

Mails to Russia. Transmission of parcels through the mails to all parts of Russia, has been resumed it was announced from the Russian post office recently. Parcels may now be accepted, at the sender's risk, for shipment to all parts of the country, including both Russia and Europe, with the exception of the Ukraine. They will also be sent to Russia in Asia, except to Turkistan, the Maritime provinces of Russia, Amur province, and Russian Siamland.

A Youthful Financier. Lady—Do you know where Johnny Jones lives?
Boy—Yes, but he ain't home. If you give me a nickel I'll find him for you.

Lady—All right, here you are, where is he?
Boy—Here. Pin him.

A towns pre heated by electricity is a recent French invention.

Gas Laden Silos

Danger of Asphyxiation If Care Is Not Taken.

A new phase of agricultural life has come this year, with the erection of silos in the province, and a timely warning based on facts, which have occurred in other parts of the country, may not be amiss.

In Kane County, Illinois, two men lost their lives by going into gas-laden silos. The first man went into the partly filled silo. He did not return. The second man went in to see what was wrong, he did not return. The third man went in after the two first, and he was saved, but had a close call. This is sufficient reason for a little warning.

A closed silo that is partly filled and stands even for a few hours is likely to develop a gas heavier than air, which settles at the bottom, and asphyxiates those who venture in.

A safe way to obviate trouble is to lower a light lantern down to the bottom, and if this is snuffed out, no good circulation should be provided before anyone is permitted to enter the silo. It may be a nuisance to lower the doors, and it is not a safe way to provide circulation of air, but it is the only method to follow.

An expert on this subject is warning is not necessary, yet the better he is, the more he is.

Territory Cedes To Crown

Various Indian Tribes In North Accepted Government Buyout.

As a result of the work of the government treaty party, which has been in the north during the summer, 37,000 square miles of territory have been ceded by the various Indian tribes to the crown, and about 1,500 Indians who hitherto had not been included, have signed their willingness to accept the government buyout.

H. A. Conroy, Federal Indian agent from Ottawa, went as far north as Fort MacPherson, where he is travelling in a specially constructed house boat. This vessel was pushed by the Hudson Bay Company's gas boat "Hudson" and the new method of travel was quite satisfactory, states the Indian commissioner.

An escort of three members of the Royal Canadian Mounted Police accompanied Mr. Conroy.

Discovery Modifies Newton Theory

Professor Gray Gravitation Subject to Local Modifications.

Prof. Bartelli has made an important scientific discovery which, it is said, largely modifies the Newton and Laplace theories. After long study with his own apparatus Prof. Bartelli discovered that the gravitation of the terrestrial surface is subject to great local modifications, this being due to the determined local external causes. Sometimes the modifications were unexpected, such as the relations of the moon. Most important factor in his discovery consists of the electrical influence on gravitation, which may be inverted during a hurricane.

Canadian Record For Haulage

A Canadian record for haulage was established in his country. The haulage of a mile long, drawn by two of the largest engines in the service, with 75 cars containing 55,000 bushels of grain, reached Fort William, Ont., recently.

His Fingers Crossed.

Judge—Be careful, sir, or I'll commit you for contempt of court. The witness—I've expressed no contempt for your lord. On the contrary, I've carefully concealed my feelings—London Mail.

German guns were recently being destroyed under a peace treaty at a rate of 1,000 a week.

Dreams That Pay

Plumber Made Fortune Out of Wife's Dream Ideas.

A London physician insists that there is money in dreams and knows a number of instances to prove his assertion.

A number of Bristol once made £10,000 out of a dream idea of his wife's. One night she dreamed that she saw her husband making what he thought of as the top of a high tower.

The vision was so vivid that he was convinced it was not a dream, but an inspiration. And next morning he was able to construct a tower.

The plumber was a practical man and did not believe in dreams. But, forced by his wife, he made a few experiments.

He was surprised to find that he could make excellent small short for pouring, which had through a sieve into water from a height. So he took out of patent which he said for his invention. All that he could recall was that his wife had dreamed again.

It was a dream which gave Homer Walpole the idea for his famous novel "The Castle of Otranto." He awoke one morning from a vivid dream which quickly vanished from his memory. All that he could recall was a feeling of horror as he stood in the hall of an ancient castle. For as he gazed up the great staircase he suddenly appeared before his eyes a giant hand in armor.

So strong was his feeling of awe that he wrote the novel. He began to write without knowledge in the least what he was going to say. He followed the book in two months and it turned out to be a "best seller," running through many editions.

It was in a day dream that Coleridge composed his wonderful poem "Kubla Khan." He had been out of bed in his hand he felt a strange chair, just reading the following words: "Here the Kubla Khan commanded a palace to be built, and a stately garden thereunto." He had for some hours, and in his sleep composed a long poem of mystery. On waking he had a clear recollection of it, and began eagerly to write it down.

He had completed little more than 50 lines when he was called away on business and the rest of the poem passed out of his mind. But the fragment which he succeeded in recording is one of the priceless gems of English poetry. It is not money for poets to compose in their dreams. But these inspirations always are not happy.

Among many people there exists the belief that a silver wire with a piece of copper led into the side will cure rheumatism.

French burglars recently made use of chlorine gas to overcome watch-dogs.

Experiments Show No Great Advantage From Deep Ploughing

At what depth should land be ploughed is a question that has been asked a great many times and has received a wide variety of answers, but in the end each farmer has worked in the depth to suit himself and his conditions, and has gone on contented. It has been the subject of a number of village experiments but many of these have not agreed. Recent experiments tend to show that the depth that perhaps the majority of farmers have accepted as most convenient is after all the best suited to the different crops.

It has been a common practice for many agricultural authorities in Colleges and Experiment Stations to urge deeper ploughing and as long as the depth of the ploughing was done by horses with men steering the plough, this advice was probably needed and in any case was not likely to cause the ploughing to be done too deeply. With the advent of the tractor and the mechanically controlled plough another factor is brought into play. The call of the agricultural expert for deeper ploughing has provided a good selling point for the tractor salesman. It is obviously easier to plough deeply with the tractor power than it is with the man's plough horse. It is then there a danger that the ploughing may be done too deeply to secure the greatest returns considering the crop and the extra cost of the tractor and ploughing.

In this connection, the results of village experiments conducted at experimental stations in the United States and published in a recent issue of the Breeders' Gazette may prove a valuable guide. The Utah Experiment Station reports the following average yields of wheat from 18-month ploughing experiments conducted on four experimental farms during a five-year period of 1901 to 1908 inclusive:

Ploughed 8 inches deep, 23.3, 11.6, 14.2 and 5 bushels per acre.
Ploughed 10 inches deep, 23.4, 12.0, 14.8 and 5 bushels per acre.
Ploughed 15 inches deep, 16.9, 15.2, 14.8 and 6.8 bushels per acre.
Ploughed and subsoiled 18 to 20 inches deep, 15.4, 15.2, 16.2 and 6.4 bushels per acre.

The same station stated that four years' work on depth-ploughing experiments found comparing results from ploughing at a depth of 7½ inches and a depth of 15 inches with barley and corn the results were very slightly (100 lbs. in the acre) in favor of the 7½ inch depth. With oats and wheat the difference was even less and slightly favored the deeper ploughing.

The Ohio station found similar results from a five-year test at the same depth and with nearly the same crops, except that they experimented with a subsoiler, which increased the yield slightly but not nearly enough to pay for the extra cost. At the Illinois station they made even fuller per acre and they reported results as follows:

"We have been conducting ploughing experiments on brown soil farms for some time, and have found that the experiments included full ploughing to a depth of 7 inches with the moldboard plough and up to 14 inches in the spring from depths of 3½ to 7 inches. In none of these experiments has the deeper ploughing shown any marked advantage. So far as we can determine from our

present information, it does not pay to plough over 7 inches deep. This seems to apply to all soils and probably to all crop except potatoes."

The results from other experimental station ploughed much the same conclusion. It is found that the extra land ploughed to a depth of 7 inches will give equal results at far less cost than land ploughed at a shallower depth than 7 inches. Much would seem to depend upon the type of soil being worked, the time of year in which the ploughing is done and the crop which is to be grown. The opinions of the U.S. Experiment Station authorities on this matter are summed up by the writer of the article in the following words:

"Full ploughing should be from 1 inch to 2 inches deeper than spring ploughing. Sandy types of soil should be ploughed shallower than other types of soil. The maximum depths of ploughing recommended range from 5 inches for sandy soil up to 7 and 8 inches for other types of soil. The call of the agricultural expert for deeper ploughing favors the full ploughing of other types of soils than the sands to a depth of approximately 7 inches, which is not strictly in accord with the results of the rather meager experience of the writer. The extra cost of ploughing has varied from 4 to 8 inches."

To allow the many factors that may influence the depth and after the results he gives the instance of an Illinois farmer who ploughed the depth of 7 inches for the last five years. In the intermediate years he ploughed to a shallower depth as it was less expensive. The results of the ploughing were that the ploughing has varied from 4 to 8 inches.

The latter plan, we believe, is the most commonly followed by farmers, ploughing down to 7 inches for corn and round and to 4 or 5 inches for the grain crops or on light soils. In the colder sections the frost has a lessening effect upon the soil that should render deep ploughing unnecessary and a variation in the depth of ploughing is not being termed at any point. Then why go to the expense of ploughing deeper?

**Secret Of Success
Of Lloyd George**

Racial Educator Speaks of Remarkable Quality of Welsh People

Dr. Thomas Jones Jones, formerly specialist on racial education in the United States. Bureau of Education, who is now in London, in an interview expressed the opinion that the success of Mr. Lloyd George in the response the negotiations which he had been able to carry out between nations was to be explained by the fact that he personified the long front has a host of people who have had in dealing with perplexing situations between nations and races.

What his enemies had been able to do in the early days of the war. This week the foundation stone of the new Llanvyn Library is to be laid, and the Llanvyn people have had in dealing with perplexing situations between nations and races.

In another column we have a correspondent giving voice to his views on the tariff question in poetical strain. To our way of thinking the tariff policy is like the weather and clothes. We change our clothes according to season. Likewise the tariff is adjustable to times and conditions. We believe this is more so at this period owing to the rapid changing of conditions. At the present time the majority voice of western people is for taking off the tariff on manufactures, more especially farm machinery, and free trade is a fairly popular cry. The scarcity of money and general hard times are causes in the demand for cheaper manufactures and the abolishment of the tariff is expected to have this effect. However, can we expect that any government, likely to be elected would give absolute free trade? Our tariff policy undoubtedly needs re-organiza-

tion. Re-adjustment is necessary in order that the West may secure its needs on a fairer basis. A heavy tariff wall or an absolutely wide-open gate are the extremes. The U.S. tariffs and exchange advantages have not made for good times in that country, indeed, they are reported as having an adverse effect.

Would Alberta Duplicate This Offer To Farmers?

The following is an abstract from a circular sent out by the Sask. Provincial Dept. of Agriculture, Live Stock Branch, Regina, Sask. It is a good offer to sell young dairy stock of Eastern breed, on terms at moderate prices. We are of opinion the plan could be copied with good results by the Alberta Dept., and would be the means of turning many farmers from grain farming to mixed farming.

"It would appear that this is an opportune time for farmers to purchase Eastern-bred stock. Prices will be considerably lower than last season. When ordering dairy stock, I would recommend the purchase of 2-year-old heifers which for all probability are bred on freedom during the late Fall or Winter months. Cows are not satisfactory because frequently the cows offered for sale are shy

Home Town Paper Week

is the

Second Week in November

7th to 12th

If you don't take the Home Town Paper, subscribe then.

If you do take it renew your subscription then.

It is very rare for a local newspaper to boost its own business, although it gives quantities of space to boosting others. It has been suggested that the newspapers of the country should adopt a week in which their own business should be given precedent. The Empress Express thoroughly endorses the idea. Thousands of papers will join in the event. We ask readers and advertisers to turn in and lend a hand during "Subscribe for Your Home Town Paper Week," and boost for us.

brooders, hard-milkers, or have some other defect. However, the Department is prepared to purchase a limited number of good young cows. Prices in certain lots delivered at your station will possibly range as follows:

Yearlings, \$40.00 to \$60.00
2-year heifers, 70.00 to 90.00
Cows, 100.00 to 130.00
The Department will assist some file Saskatchewan farmers to purchase Eastern-bred stock on a one-half cash basis to the extent of \$1,000.00; balance due in two payments, — heifers first note to be due December, 1922, and the second note to be due December, 1923, with interest at 6 per cent per annum. The Department is writing for more definite information regarding prices, but owing to the lateness of the season it is essential that all orders be forwarded to the Department at an early date, in order that the stock may be delivered before freeze-up."

What joy to run over the school promotions and find that the tots of a few weeks ago are moving higher and higher in scholastic circles and eventually blossom forth as "Sweet girl graduates," or the clean strong boys descending kickers.

Just what that hardened old city caddy open up his home paper — it is the first thing he picks up out of his bunch of mail — and what can he find there to interest him? Angus McGinnis' horse died yesterday. Peter McGregor will run for rural reeve; Honore Jell opens a millinery store in one side of the printing office; Mrs. Brown lost her hand sachel in the kitchen; Dr. Dorland is attending Clara Brown who is down with a severe cold. Mrs. Plater broke her ankle and is in the union hospital.

Yet though he smiles at the old time styles and expressions he enjoys it all over and over again, for it takes his mind back home where his wonderful boyhood days — happy days — were spent.

Calgary prices for Cream, given in the "Market Examiner" are: Special grade butter, first grade, 32c; second grade, 28c. These are same as prevail locally.

Every Four Corners has its Home Town week now days, but all the boys and girls who have wandered from the Township Centre cannot get back to enjoy the loved surroundings. But all can subscribe to the old home town paper and keep in touch with the little spot they once called home.

TAX SALE

Sale of lands in the Village of Empress for Arrears of Taxes

NOTICE IS HEREBY GIVEN that certain lands in the Village of Empress will be offered for sale for Arrears of Taxes and Costs, on Tuesday the First Day of November, 1921, at 11 o'clock A.M. at the office of the Secretary-Treasurer, unless the arrears of taxes and costs be sooner paid.

A full list of the said lands may be found in the issue of the "Empress Express," of Thursday, the First Day of September, 1921.

D. McRACHEN,
Treasurer.

The Biggest Liar Wins

Three artists were once discussing the merits of their work. The first one said: "I once painted a piece of marble so realistically that when placed in water it sank." "That's nothing," the second one replied, "I hung a thermometer on one of my Artie scenes, and it immediately went below zero. Not to be outdone, the third artist related that a portrait he had painted was so life-like that it had to be shaved three times a week. A single fact outweighs a thousand claims, and it will only take a couple minutes to examine our stock and compare our prices. It's your chance to prove us and profit yourself.

Chinamen Unearth Platinum Treasure

Original Prospectors Find Metal Valued at \$7,100 Here

Cached away under a square slab of rock in the Tuluamen district, just south of Princeton, a big sack bottle containing six pounds of platinum lay undiscovered for over thirty years. When the bottle was hidden away, the contents were worth \$48. Recently with platinum quoted at \$75 an ounce, the treasure realized \$7,100.

At Fox, Chew Lunn, Ning Pam and Soe Key, four Chinese prospectors and miners who wandered over the Tuluamen district in the early nineties, laboriously gathered the platinum, then valued at \$50 cents an ounce. One day, when breaking camp and going different directions, it was decided to cache the platinum for return for it the following year.

The opportunity never came. The four Chinamen drifted apart, and in the course of time all returned to China. Last year, a quarter of a century ago, they met again at a celebration, got to talking over old times, remembered the cache of platinum, and suddenly realized it had a fortune under that square slab of rock.

With true Oriental thoroughness, and perhaps a slight suspicion of regarding the honesty of each other, all four decided to make the journey to Canada and recover the sack bottle. Not without considerable difficulty, the spot was located in spite of the changes that had taken place in 30 years, and very early one morning the rock was turned over and the platinum again in possession of the Chinamen.

At Fox, Chew Lunn, Ning Pam and Soe Key are returning home to their native village where, with a fortune of \$7,150, they will live like a king for the rest of his days.

Keep Things Going

Everyone Must Help Revival to Gather Strength

Depression can't last for ever, because the world is not going to do without the things it wants for all time. Outside the world, many countries are today better equipped for raising the standard of living than ever they have before. They have more and better machinery, and greater scientific knowledge, than they had even ten years ago. And they will use their advantages with more and more effect as the troubles caused by the huge upheaval of war die away. Manifold as a whole, the situation still not back. It advances. After every check it eventually presses forward with increased eagerness and energy. A revival must come. It is impossible to believe that all the people in the world have in some mysterious manner lost all initiative and their ambition since 1914. But whilst the revival is slowly gathering strength, don't hamper it by forcing primary activity down to a lower level. Don't stop buying. Keep things going. And they will keep you going—From the Johannesburg Times.

Operators Enjoy Radiohone Concert

Musical in California Heard by Vancouver Wireless Operators.

A concert at San Jose, Calif., afforded enjoyment to an audience of wireless operators at Gonzales Hill Station and amateurs throughout the coast. The music was heard by a radiohone concert in the California town more than 500 miles away. It was sent out into the ether by wireless telephone and was heard here as distinct and as free of interruptions as though coming from the next room.

"It was most entertaining," remarked the operator at Gonzales. "We could hear anything, even pick up the words. The music was 'Songs Without Words,' and very nice it was, too."

Obstructed Vision.

Very Stout Old Gentleman—"Here my lad, is a nickel for you. Now tell me if my shoes need polishing." Boston Transcript.

The Sunday school class was singing, "I want to be an angel." "Why don't you sing louder, Bobby?" "I'm singing as loud as I feel," explained Bobby.

The quaint belief that a necklace of blue beads protects children and especially girl children, from bronchitis, is very widespread.

The latest London directory contains more than 17,000 names. The Smiths engaged in business in that city.

Things About a Day

No Reservations About What Can Be Done With It

In the first place you can do with a day as you choose. It comes to you with no reservations.

If it is a rainy day you may enter it in the spirit of gloom and don't care-ness, or you can say to yourself: "Now won't things be fresh from this rain?"

I tried to take a picture of the other day at high noon. But somehow I failed to pick a good side for one. I could not read and get the best of it. There all in a second I said to myself that the reason was that there were no shadows to the picture!

What is more beautiful than the lengthening shadows of the day?

The thing that makes the new day especially attractive to me, however, is that it may be started fresh. No matter how full of mistakes or discouragements of failures yesterday may have been—the new day that comes is like a clean slate. You can begin all over it.

There is always something interesting to be learned. There are just a few of the things that a day brings.

Some go into a day and miss everything. As though it were a new experience—new changes to help someone to be happier! These are just a few of the things that a day brings.

For each day is a good deal of a surprise. It looks quite the same as the day that has preceded it, but in reality it is all new. Therefore a virgin field for work and achievement.

How much you can put into a day. That is necessary if you hope at all to take anything out.

George Matthews Adams.

Sealing The Silo

Many Use Method of Merely Tramping Silage Well

In an investigation conducted in Iowa to determine the best methods of silage making, it was found that different practices were in vogue. About thirty per cent. of the men reported favoring the method of removing the silage from the last three or four loads of fodder to go into the silo, thus sealing it with silage made of stalks, which is but a minor loss of silage.

Other men use clay or dirt, straw, or tar paper for sealing purposes. Of the men who reported that they used seal—merely tramping the silage well at frequent intervals immediately after filling.

Says Canada Acted While U. S. Slept

Iowa Paper Pays Compliment to Soldier Land Settlement Scheme. Under the caption, "Canada Acted While U. S. Slept," the Register (Iowa) Register comments on the fact that Canada has placed over 25,000 returned men on the land with loans amounting to over \$800,000.

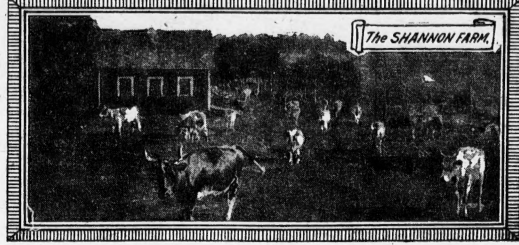

"It," says the Register, "we look at, nothing in this statement but the concluding words to men, placed on farms and credit extended to them we shall see how intelligently our northern neighbors have set about the matter. It is something that we are doing badly or not at all."

"Considering that Canada was in the war for four years, that the national debt per capita is very great in Canada, that relatively Canada has had a far larger number of men to care the debt, it is something that we are doing badly or not at all."

"The prisoner tried hard to collect his thoughts. 'Well, the more I look at him, the more likely it seems that I did,' he replied—Lawyer and Banker."

Nearly all the great reformers or founders of religion had red hair.

Pure-Bred Stock at Cloverdale, B.C.

The south side of the Fraser River Valley is known as the best dairy farming district in British Columbia. Some of this most fertile land has been farmed for thirty and forty years and is paying its owners back with full interest on all their toil of clearing it. All the best farmers are going in hot and steady for pure-bred stock, chiefly Holsteins, Jerseys and Ayrshires and nearly all of them have the latest type of cowhouse and most up-to-date appliances.

One of the largest and oldest farms is that of Shannon Brothers who were born and bred in the neighborhood and settled on their present farm of two hundred and thirty-five acres when it was forest and thirty-five years ago. Their Valley is known as the best dairy farming district in British Columbia. Some of this most fertile land has been farmed for thirty and forty years and is paying its owners back with full interest on all their toil of clearing it. All the best farmers are going in hot and steady for pure-bred stock, chiefly Holsteins, Jerseys and Ayrshires and nearly all of them have the latest type of cowhouse and most up-to-date appliances.

One of their cows, "Grandview Rose," whose sire came straight from Scotland, is supposed to be the best Ayrshire in the British Empire and has a wonderful record of 2,453 lbs. milk and 1,035 lbs. butter fat in 364 days. The Shannons think little of paying \$1,000 for a bull calf in their great regard for pedigree and breeding to type.

All the milking is done by an electric milking machine, the most modern in every detail even to the use of a litter carrier. As in all dairy farms in B.C. the cattle are stabled throughout the winter, a mixture of oats and vetch.

The president of what is said to be the largest van and auto moving service in Canada, says that the general delivery business requires a stock of 250 horses valued at \$250 each, with an estimated annual depreciation of 20 per cent. It is estimated that twenty auto trucks which are claimed to equal the work of 120 horses.

As a lot of the delivery work is for long hauls this is to be expected, but he states that for a distance of two miles they prefer transportation by horse. The cost from 50 to 100 per cent. less than for team work, stated the president, they use horse teams made up from 1,000 to 1,800 pounds, but for light fast work prefer horses of somewhat lighter weight.

These conclusions of city transport men are well summed up by H. S. Arrell, the Dominion Livestock Commission, in the following words: "There is one outstanding type of horse which it is conceded is the most profitable, year in and year out, for the Canadian farmer to produce. This is the drafter with weight, quality and action. The drafter alone is like the rest of the world, and the competition of motor transportation. It alone is able to command satisfactory commercial value at all times of the year and under all conditions of the trade. It may not be the easiest horse to breed and rear, but he is always a marketable asset from the time he is born until he reaches the ripe old age."

Establish Supply Base In North

Party From Nome Have Gone to Wrangell Island.

The power schooner Silver Wave, Captain Jack Hammer, under charter to Vignall Steamship, with an advance company of men, Alvin Crawford, E. Lorne Knight, F. W. Maurer and Milton Jolly, who arrived on the last steamer from Seattle, and Ada Black, an Eskimo woman, of Nome, sailed from Nome for Wrangell Island in the Arctic ocean off the northeast coast of Siberia.

The party will establish a base for supply at Wrangell Island for future exploration work to be carried on by the Silver Wave, and will join the Silver Wave, with others, will join them at the base next summer.

The party carried dog teams and sledges, and will be supplied with food. They will depend on their hunters to furnish fresh meat.

Natives In East Are Miserable. It is estimated that at least ten million dollars in gold is hoarded every year by the natives in India, China and Persia, for whom gold has a wonderful fascination. Any gold that comes into their hands as booty is hidden away, it is immediately hidden away.

Wolves have the greatest staying power of any animal in the animal kingdom. A prairie wolf has been known to cover 114 miles in three hours, or at the rate of 38 miles an hour.

The Egyptians used petroleum centuries before the Christian era, and in China and Japan oil deposits have been worked in a crude way for thousands of years.

A town cannot grow without business. By helping your local dealer you assist the community.

Several instances have occurred of the admission of phonograph records as legal evidence in court.

Chalk is formed almost entirely from the shells of creatures which once lived in the water. Wherever we see chalk in a state of nature, we know that a sea or lake once occupied the site.

California's rice crop last year amounted to 150,000 tons on soil formerly thought worthless.

Oh, Money!
Money!
—BY—
ELEANOR H. FORTER

Printed by Special Arrangements with The Allen, Toronto, Ont.

I don't think Mellicent's real heart is affected in the least—she's only eighteen, remember—but her pride is. And her mother—Mrs. Jane is thoroughly angry as well as horrified. She says Mellicent is even what she calls as those Pennocks, and that the woman who would let a paltry thing like money stand in the way of her son's affections is a pretty small specimen. For her part, she never did have any use for rich folks, anyway, and she is proud and glad that she's not. I'm afraid Mrs. Jane was very angry when she said that. However, so much for her—and the may change her opinion one of these days.

My private suspicion is that young Pennock is almost certainly, and is pulling hard at his mother's lending string; for it was Pennock who, on the other day when we met the lad face to face on the street, Mellicent said he had turned all colors of the rainbow with terror, pleading, pleading, and assumed indifference all chasing each other across his face. Dear, dear, but he was a sight!

There is, too, another feature in the case. It seems that a new family by the name of Gaylord have come to town and opened up the old Gaylord mansion. Gaylord is a son of old Peter Gaylord, and is a millionaire. They are making quite a splash in the way of balls and liveried servants and motor cars, and the town is agog with it all. There are young people in the family, and especially there is a girl Miss Pearl, whom, report says, the Pennocks have selected as being a suitable mate for Carl. At all events the Pennock and the Gaylords have struck up a furious friendship, and the young people of both families are in the forefront of innumerable social affairs, some of which Mellicent is left out.

So now you have the whole story. And next month comes to Mellicent's father one hundred thousand dollars. Do you wonder I say the plot thickens? As for myself, you should see me! I eat whatever I like. (The man who says health is built to me now gets knocked down—and I've got the strength to do it, too!) I can walk miles and not know it. I've gained twenty pounds, and I'm having the time of my life. I'm even enjoying being a genealogist, and I've almost exhausted the resources of Hillerton, and have begun to make trips to the neighboring towns. I can even spend an afternoon in an old cemetery copying data from some of the gravestones, and not entirely lose my appetite for a good meal and a glass of beer.

I was even congratulating myself on this, when the other day, quite suddenly, I met the real thing. Heavens, Ned, that man had fourteen thousand four hundred and seventy-two names at his tongue's end. He knows the name of every Blake (he was a Blake) back to the year one, how many children they had (and they had some families then, let me tell you), and when they all died, and why. I met him one morning in a cemetery. "I was hunting for a certain name and I asked him a question. Heavens! It was like seeing a match to one of those Fourth-of-July flowerpot sky-rocket affairs. That question was the match that set him going, and thereafter he was a quaking quiver of names and dates. I never heard anything like it.

He began at the Blaisdells, but skipped almost at once to the Blakes. There were a lot of them near us. In five minutes he had me dumb from sheer stupefaction. In ten minutes he had made a century run, and by noon he had got to the end of the line. He went through the Dark Ages very appropriately, waiting in an open tomb for a hundred years to pass. We had got to the year one when I had to leave to drive back to Hillerton. I've invited him to come to see Father.

Foch Warns Against Germany

Tells Veterans France Cannot Yet Sleep Soundly.
Mars-la-Tour, 12 Dec. (AP)—Foch, in a recent speech to the Veterans at Marlaux, said: "Always beside us are the vanquished who are not yet dead. I ask you not to let them out of your sight. He assured that they are always alive and have not abandoned their idea of revenge."
"They will only respect us as long as we are strong. I ask you to absorb the idea that France is unable to sleep soundly without risking a 'veritable awakening.'"

Tank Is British Invention

Was One of Most Important in History of War.
The tank is a British invention. "The Allied armies," says the Daily Mail (London Year Book for 1919), "the British invention of the tank has been recognized in 1916 as one of the most important of the whole history of war, and tanks of various patterns were built and adopted by the French and American armies, as well as by the British." A special Tank Corps for the use of tanks was formed in the British army, and a system of tactics worked out. The forms of tanks were used—a large heavy type, and a much smaller and lighter pattern which could move faster and outrun any infantry and, indeed, most cavalry where the conditions were really so favorable. The tank of the large class was similar to the battleship in naval war; the tank of the smaller class resembled the destroyer.

With these valuable machines a great economy of infantry could be effected, and thousands of valuable lives saved. Lieut.-Col. J. E. C. Fuller, who was Chief General Staff Officer of the British Tank Corps from 1916 to August, 1918, and is the greatest authority on tanks, has published a work on "Tanks in the Great War" (1919).

A British Heligoland.
The Heligoland, it is said, is agitating for self-determination, and, once again, to become British subjects. Why should they? The island was never of use to Germany except as a naval station; and Germany has no use for it. As for the islanders, few of them are of German race; and they recollect that when the British administration was easy, taxes were low and a single policeman sufficed to keep order among them.—London Sunday Pictorial.

A Witty Chauffeur.
The chauffeur never stops except when addressed, but his few utterances, given in a broad brogue, were full of wit.
"One of the men in the party remarked: 'You're a bright sort of a fellow, and it's easy to see that your people came from Ireland.'"
"No, sir," replied Pat, "they're from yeh!"

It pays to patronize home industry. Buy from the merchants in your own town.
"The most remarkable incident of the trip," Mr. de Wolfe said to a London Daily Mail reporter, "was probably our dip. On the fifth day down from Newfoundland the Neith was overtaken by a British ship in mid-Atlantic, a thousand miles from land."
"It was then, looking down on her from the crest of a 20-foot wave, that I realized for the first time what a craft she is."

"Once we ran into a 50-mile-an-hour gale, but the Neith made nothing of riding through that. That night, when the seas were pounding the Neith forward, I was asked to see what sort of weather Sambo (the negro cook) was making."
"I found him on his knees, with everything loose in his gear, rattling around him and towels tied round his ears to drown the noise. 'Laws,' he prayed, 'if Yolla's awgine to take me, take me quick.'"

South Sea Islanders Like Golf.
Some South Sea Islanders on their first trip to the U.S. saw a few golfers, and now several outfits of golf paraphernalia are on their way to the South Seas.
In England, to secure greater safety on the highways, patrols are stationed at dangerous crossroads to warn motorists, and at bad stretches of road.

Children Cry for Fletcher's

CASTORIA
Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine even more essential for babies. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

The Seven Seas Fame Came Unsought

Separate Continent Surrounds Each According to Hindu Mythology.
The "Seven Seas" exist in Hindu mythology, according to the Jurnans the earth is circular and flat, like the flower of a water lily. Its circumference is 4 billion miles. In the centre is Mount Sumeru. On this mountain are three peaks formed of gold, pearls and precious stones, where the deities reside. At its base are three mountains, on each of which grows a tree 8,000 miles high. The country furthest from these mountains is bounded by the salt sea. Beyond this there are six others where the sugar cane juice, of spirituous liquors, of clarified butter, or curds, of milk and nectar. Each sea is surrounded by a separate continent.

The two extremes in human hair are that of the negro, flat in section and curly, and that of the Mongolian, which is round and straight.

ASPIRIN

"Bayer" only is Genuine
The patriotic man is loyal to his country and to the community in which he lives. If he is consistent he will give first preference to Canadian made goods when making purchases. He will also stand loyally by his local dealer.

A Dark Voyage.
Salesman—Nice weather for travel.
Travel Agent—Yes, but I'm afraid to station anyone more. I became engaged once while going through a tunnel.

Welding cables on bridges three hundred feet above the ground is the work of a Jersey City woman. She is the mother of two children and earns \$30 a day at her work.

The Way to Save

It is the systematic regularity with which you make small deposits, rather than the occasional banking of a considerable amount, that steadily builds up a substantial financial backing.

Get the habit of definitely depositing. Three dollars saved every week, with interest at 3% compounded semi-annually, in five years will amount to \$841.02.
